A little bit about this.....

The importance of English language is increasing day by day. Realizing this importance, the then Education Minister Mr. More has made a compulsory mandatory in the English subject course from Class 1. Therefore, the importance of English language has increased. Since English is an international language, this language has gained a lot of importance in daily life and in practice.

I was thinking that I should take special efforts as a teacher to get students in our rural areas not to fall behind and also to gain mastery over the English language. English language has created fear in the minds of the students, and to teach them a pleasant way to overcome the fear, English language has become a reality. Many teachers have tried to teach based on knowledge based research, many educational material, projects and activities have been prepared for this. I have done this very little effort. Of course, study will be used in teaching. As a result, learning from the games will help to overcome fear of English, create interest and to consolidate the subject.

Understand this if there are any mistakes. If there are any suggestions, then let them know.

THANK YOU !
